40 years of WEISS

Herzlichen
Glückwunsch!

Response exceeded all expectations

The week-long WEISS anniversary celebrations and in-house innovation exhibition were a terrific success. More than 500 visitors, guests, customers and partners attended our events and celebrations at our Buchen site in the course of the festival week. The response exceeded even the most optimistic expectations.

Many of our customers, some of whom have been with us for many years, have been familiar only with our products until now, and often know little about the actual WEISS company. In the course of our anniversary celebrations and the in-house innovation exhibition we therefore offered you the opportunity to get to know WEISS from the inside. We wanted to provide an introduction to the company that goes beyond our products, extending to our manufacturing philosophy, our location, our employees, our visions. Yet, we were still positively surprised by how closely

Company founder Dieter Weiss receives a Medal of Honour from the city of Buchen.

this reflected the wishes of our customers and the level of interest shown. This has made it clear to us how important it is today to show who you are, where you come from, how you work and what you believe in. It is a known fact that seeing something with your own eyes and understanding it literally is still the best way to build trust and establish living relationships. As a result of this experience, we will extend and intensify contact and dialogue with our customers at our site in Buchen.

40th anniversary of WEISS – it was good to be there

For a whole week, WEISS celebrated its fortieth anniversary in May, with customers and partners, employees and their families. Providing an insight into the world and visions of a successful medium-sized machine constructor.

The in-house innovation exhibition: Solution excellence you can touch.

Many guests get to know a completely new side of WEISS.

The commitment to Buchen extends to the selection of food laid on by the caterers.

A platform for dialogue, the exchange of ideas and innovation.

A guided tour of the factory in small groups allows visitors to obtain a picture of a modern manufacturing facility with 100% vertical integration.

Uwe Weiss at the culinary event evening at the Heidersbacher Mühle.

Saturday evening is dedicated to the workforce. This is the awards ceremony for our employees celebrating an anniversary.

“One can only congratulate them: WEISS has become a global player without losing the values of a traditional family business.”

Klaus Hauser, Tampoprint AG

“I arrived without any great expectations, but when I go home now I only have positive things to report.”

Werner Authaler, Authaler Engineering

“It’s simply good to see that nothing here is frantically thrown together, that everything is produced from the same source to the same quality level.”

Gerald Creter, GM Europe GmbH

“Managing Directors are always enthusiastic about their products and solutions. I am used to that. At WEISS every employee speaks this way. That surprised me.”

Jan Zak, Ingenia GmbH

“I have known WEISS for 25 years. Somehow I have always assumed that WEISS only manufactures electro-mechanical rotary indexing tables. The new generation of products has really taken me by surprise.”

Walter Grün, Grün & Köder GmbH

“Absolutely fascinating to experience how a medium-sized company can go against the general trend with its commitment to Germany and its site in Buchen and be successful with it. I hope that others find the courage to go a similar way.”

Matthias Stech, MS Automation GmbH
